## Academic employment

---

**2025 (– 2026)** Assistant Professor of Research, Computer Science Department, University of Texas at El Paso

## Education

---

**2021 – 2025** PhD, Societal Computing, School of Computer Science, Carnegie Mellon University  
*Thesis:* Human and AI Decision-Making in Cybersecurity: A Multiagent Modeling Perspective  
*Advisors:* Cleotilde Gonzalez, Fei Fang  
*Committee:* Cleotilde Gonzalez, Fei Fang, Christian Lebiere, Prashanth Rajivan, Tiffany Bao

**2019 – 2021** MSc, Information Technology, Information Networking Institute, Carnegie Mellon University

**2015 – 2019** BS, Software Engineering, Xi'an Jiaotong University

## Honors and awards

---

**2026** University Research Institute (URI) award, University of Texas at El Paso

**2025** SCS Presidential Fellowship, Carnegie Mellon University

**2023 – 2024** Women in Cybersecurity Student Scholarship

**2023** Accelerating Foundation Models Research (PI: Cleotilde Gonzalez)

**2018** Foho Technical Innovation Grant — 1 of 77 awarded

**2016 – 2018** National Encouragement Scholarship, Xi'an Jiaotong University — 3 of 77 awarded

## Invited talks and selected events

---

**2025** Invited talk, Brown Bag Seminar, Arizona State University

**2025** Selected lightning talk, CMU Industry-Academia Partnership (IAP) Workshop

**2025** Selected participant, Human-AI Teaming for Decision-Making Workshop

**2024** Speaker, *Turing-like Experiment in a Cyber Defense Game*, AAAI Spring Symposium on Human-Like Learning

**2024** Speaker, *Human-AI Team Defense Game*, Women in Cybersecurity (WiCyS)

**2023** Invited panelist, *Multi-defender collaboration for threat intelligence sharing*, The Future of Cyber Deception Workshop

**2023** Invited speaker, *Using cognitive agents to collaborate with cyber defenders*, INFORMS

**2023** Speaker, *Human-AI Teaming for Cyber Defense*, Ellis-DDMLab Workshop

**2023** Speaker, *Cognitive Modeling of Attackers*, Women in Cybersecurity (WiCyS)

**2022** Speaker, *Learning about attackers through interactive cyber defense games*, CyLab Partners Conference

**2021** Speaker, *Cognitive Modeling of Attackers*, CyLab Partners Conference

## Teaching

---

|                    |                                                                                                                                                          |
|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>2025 Fall</b>   | Guest lecture, Graduate Research Methods — how to give an effective presentation                                                                         |
| <b>2025 Fall</b>   | Guest lecture, Introduction to Artificial Intelligence (undergraduate) — function approximation and deep reinforcement learning                          |
| <b>2025 Summer</b> | Teaching assistant, Demystifying AI for Everyone: Concepts and Applications — designed coding-free in-class activities                                   |
| <b>2024 – 2025</b> | Eberly Future Faculty Program participant — course design, pedagogy seminars, teaching consultations, syllabus design project                            |
| <b>2024 Spring</b> | Teaching assistant, 88-312 Decision Models and Games                                                                                                     |
| <b>2023 Fall</b>   | Teaching assistant, 17-759/17-599 Advanced Topics in Machine Learning and Game Theory — designed the programming assignment on strategic language agents |

### Other research and industry experience
